Welcome to Mobility 4 Kids

Mobility 4 Kids prides themselves in building specialized custom mobility devices that allow children with special needs the freedom and independence to both sit and stand so as to interact with their everyday friends. If there is a specific mobility device that you need, we welcome any inquiries or questions at anytime.

Mr. Jim Steinke
Innovative Products, Inc.
830 S. 48th St.
Grand Forks, ND 58201

Dear Jim,

The GrowBot has been Darcy's Liberator.

Unable to stand or walk independently due to a neuromuscular disease, we longed for a way to get her independently mobile and standing like other 3 year olds.

We were cautiously optimistic when we read about the capabilities of the GrowBot. It appeared to meet her needs for mobility and independence. Darcy has now had her GrowBot for several months and they are inseparable. She easily maneuvers it around our house and in the neighborhood. We take it with us everywhere to visit friends, the park and the mall. It's size means that we can take it in the back of our car without the need for a specialized transport.

The physical benefits of standing are well documented, but we have observed first hand the enormous psychological benefits of being able to stand and move independently. Darcy controls whether she sits or stands and how she moves. She loves that her GrowBot puts her at the same level as her friends and loves nothing more than chasing them on their scooters and bikes. There's no stopping her!

We want to thank you sincerely for the GrowBot. It has been truly liberating for our whole family.

Sincerely,

Anthony, Michelle, Charlie and Darcy Trinco
New Jersey
